

Cleantech Scandinavia has bold plans for 2020/2021 therefore we are looking for a **Management & Marketing Intern** to join our team and help shape the future of cleantech startups and investments!

Lund, Sweden

Full time
Paid internship

Transdisciplinary: Management, Communications
& Marketing, Environmental

Is this you?

We are looking for a creative soul and very organized team member with a digital mindset looking to create positive change in the world. You'll be an important part of a growing team, having influence over what we do and how we do it. As priorities change often, the ideal candidate has a can-do mindset and willingness to step out general role description.

This role is ideal for people with transdisciplinary skills who have a passion for environmental innovations. Your work will be key to support fulfilling our mission, to bridge the gap between startup innovations and investment opportunities.

Join a truly incredible team of fun, good-hearted, kind, and hardworking people and be a part of the Cleantech Scandinavia vision of building a greener future.

What your day will look like

Management

- You will co-develop the data collection and analysis for reporting
- You will work on administrative tasks related to website (Wordpress), membership management (CRM) and database content

Marketing

- You will create and produce content for different channels, including social media.
- You will participate and collaborate with managers developing materials for our stakeholders
- You will support event activities
- You will implement SEO, present reports to our team and develop improvements

We believe you

- Are a student or a recent graduate in Business Administration, Management, Communication & Marketing, IT, Environmental Studies. As this position require transdisciplinary skills, we are more attentive to your attitude than your diploma.
- Have a digital background and strong interest in new ways of doing things, either via work or other
- Have excellent knowledge in Office, specially Excel
- Have good knowledge/experience of creating content for different channels and target groups
- Are fluent in English, both spoken and written, as it's the main language of work. Knowledge in any of the Nordic languages is a plus.

- Are good with interpersonal, communication and empathy skills
- Want to search for innovative solutions with proactivity, energy.

What we offer

We offer an inspiring working and learning environment in which we support cleantech innovations to be implemented worldwide and reduce carbon emissions. You will have the freedom to develop ideas and creative ways of promoting the company and what we do.

The internship is paid. We're looking for someone who have a planned internship period via her/his on-going education or post-education and is available full-time during that period. Depending on both our experiences (contractor and intern) there is a chance of a work position permanently. The position is based in Lund, Sweden.

Internship duration: One year.

Interested?

Deadline: 31st of January 2020.

About Cleantech Scandinavia

We are the renowned provider and promoter of Nordic and Baltic Cleantech. Our exclusive platform of Nordic cleantech companies offers a unique opportunity for our well-established international network of investors, industrials, energy utilities, real estate companies, cities, service providers and the public sector. We provide cleantech-related investment opportunities, business intelligence and investment statistics in the Nordics.

Among our network activities, we organize every year the Cleantech Capital Day, our main event of the year, where some 250 international investors, VCs, industries and cleantech companies meet over the course of two days to network and do business. Cleantech Capital Day goes hand in hand with the Nordic Cleantech Open – this cleantech startup competition that puts the spotlight on the increasing flow of cleantech innovation from the Nordics and Baltics. During the Nordic Cleantech Open, we gather the best cleantech startups, and then our international jury of investors and corporate VCs evaluate the companies according to their innovation, market potential, and team. In addition to the network activities, we also offer consultancy services on an individual assignment basis.
