Nordic Cleantech Open Finals

2018/2019

Lund, Sweden

Out of the 116 applicants that started this edition of Nordic Cleantech Open, the final Top10 companies pitched at the Finals in Stockholm, on May 21st, and the winners have now been decided!

The winner of this edition of Nordic Cleantech Open is **SurfCleaner** (Sweden), with their unparalleled and proven solution to which is able to eliminate and separate a wide variety of pollutants from water surfaces.

The second place goes to **Moving Floor** (Sweden), who provide automatic cleaning for livestock through a system of self-cleaning floors, using modular endless belts and reducing water usage, air pollution and antibiotic usage.

And the third place goes to **Einride** (Sweden), with their transportation as a service solution based on all-electric, autonomous vehicles, or "T-pods". Using real-time traffic data, the T-pod adjusts its route to avoid congestions, optimizing battery use and delivery time.

Congratulations to all three companies for their hard work and for managing to impress the audience with their pitches!

About Nordic Cleantech Open

Nordic Cleantech Open is a start-up competition for cleantech entrepreneurs from the Nordic and Baltic regions. The purpose of the competition is to identify the best and most innovative early stage cleantech start-ups from the Nordics and Baltics, to then highlight them to our international jury of some 40 investors and industrial actors. The process puts the start-ups in the spotlight, with the goal of supporting and accelerating their transition into the global market.
