# Your host

Cleantech Scandinavia is the renowned provider and promoter of Nordic cleantech, since 2007. Our exclusive platform of Nordic cleantech companies offers a unique opportunity for our well-established international network of investors, industrials, real estate companies, cities, service providers and the public sector.

We offer cleantech-related innovation scouting, impact assessments, collaboration projects, investment opportunities and statistics, as well as business intelligence in the Nordics.

Today we have some 50 members, including venture funds, industrial ventures from leading multinational companies, real estate companies, cities, service providers and government organisations. We have members from all continents with one common interest - Nordic clean technology innovation.

## OUR COMPETITION

### NORDIC CLEANTECH OPEN

The Nordic Cleantech Open is a business competition aiming to identify, strengthen and showcase the new early-stage clean technology companies and business innovations in the Nordic and Baltic regions.

Each year, an international jury of more than 40 representatives from venture capital and multinational companies select the most promising 25 startups out of all applicants. All companies receive written feedback from the jury, which can help them to know how large industrial actors and investors see their business. Top 25 companies have the chance to meet the jury in person and further develop their business case with them.

For more information, visit [www.nordiccleantechopen.com](http://www.nordiccleantechopen.com)
