

Autonomous Driving Software

Full-Stack Autonomous Driving Software for Last Mile Vehicles

**Best Startup at Dubai
World Challenge for
Self-Driving Transport**

Main problem for last mile public transportation and logistics operators:

40-60% of Life-time Costs Come From the Drivers

Last mile operators are looking for autonomous vehicles to lower their costs and enable better service coverage, longer operating hours and increased competitiveness.

They Are Also Looking for

- Increased road safety
- Lowering CO2 and other emissions with electric and shared vehicles and optimised engine performance
- Addressing social issues by improving service quality for people without previous access to public transportation or home deliveries
- Overcoming traffic congestion with shared mobility

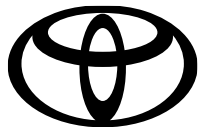

We're the Only Ones That Have Solved Autonomous Driving in Bad Weather and Changing Environments.

And give the last mile operators more operating hours and lower life-time costs.

Go-to-Market With Our Customers

Starting From 2022

AD-Kit partner in Europe.

We have made the biggest fleet of automated Toyota vehicles in Europe.

Together with their subsidiary T-Engineering we're bringing their L4 Sharing Van to the European market in 2022. We will provide the software for the mass produced last-mile shuttle.

Automation of Rob.Y platform, aiming for mass-production of professional vehicles for last-mile use cases. Product showcase in summer 2021 in Italy

**Startup
OEM**

Full-stack software for L4 shuttle bus to be announced in Autumn 2021

HD OEM

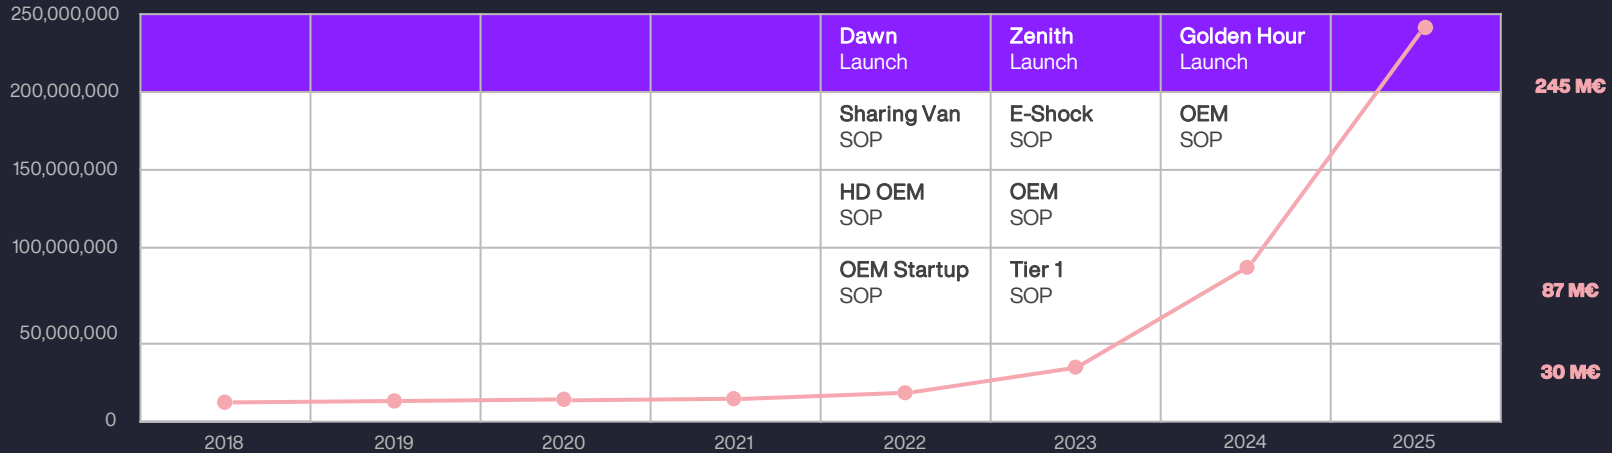

Autonomous trucks for mining area

Major Tier-1

To be announced during 2021

Revenue Growth 2018-2025 Based on Our Current Customer Relationships

SOP = Start of Production

Investment Opportunities

2020 Series A First Closing

€6 Million Invested

First Closing €6 million by NordicNinja VC and Itochu Corporation

CLOSING

2021 Series A Second Closing

Raising A2

Currently 95% committed. This round will be used for commercializing of our technology and expansion to Asia and Europe.

COMING

2023 Series B

Further market expansion and communalization as well as further developing our technology for commercial market
