

Bi@fiber

BIOFIBER TECH SWEDEN AB

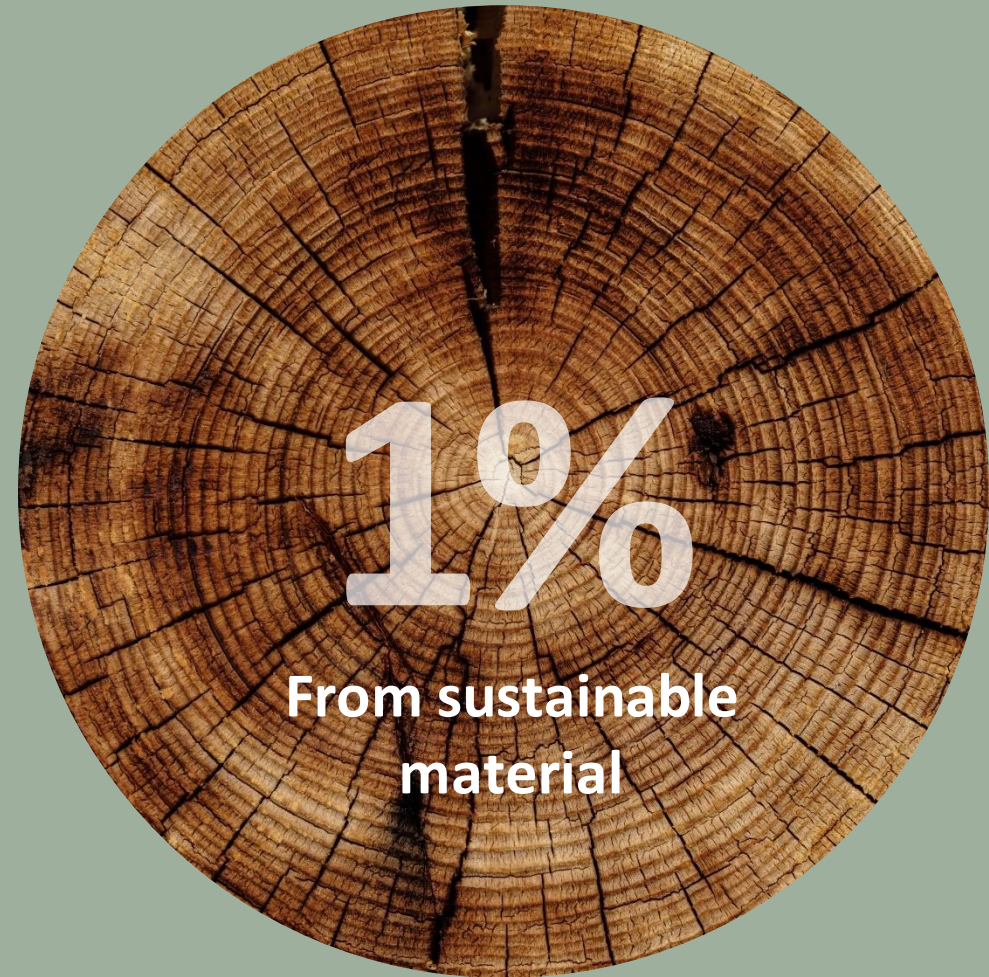

*Innovations for shaping
a sustainable future*

Reducing CO₂ emissions from plastics
through our sustainable wood fibers

FibraQTM

Plastic is an ideal material, but relies on fossil fuels

The price we are paying:

1.8 billion ton CO₂
per annum, set to double by 2060

1.8 billion ton
= 4% of global GHG emissions

Product categories

1. FibraQ plastic compounds:

- 100% Bio – Phone cases
- PP – Furniture
- Recycled PE – Toys
- ABS – Electronics & Automotive
- 3D – Furniture

2. FibraQ wood pellets
